

# PAMELA MARZBAN, DDS

## COSMETIC DENTISTRY

I chose to become a dentist because it is a profession that truly marries art and science and does it in the platform of the human connection. With the constant technological advancements within my profession, dentistry has become so much more than just teeth and gums.

I do dentistry that makes people feel healthy and confident. When people seek out my office for care, it is because of my reputation to provide comprehensive solutions in a comfortable state of the art facility. My extensive training in cosmetic dentistry, digital smile designs, sleep and airway dentistry and physiologic TMJ rehabilitation has made me a craniofacial and smile design expert. It is my training and experience that allows me to create naturally beautiful, balanced and time lasting smiles that are comfortable and uniquely tailored for each individual and their facial dynamics. Our focus is Beauty, Balance, and Breath.

My team and I continuously train to remain on the leading edge of our field. Our patients know that we have their best interest at heart, we work with integrity and we want to see them succeed. I take great pride in knowing the positive impact we make in someone's life by giving them a confident and healthy smile. It's been said that "a master in the art of living draws no sharp distinction between her work and her play. She hardly knows which is which. She simply pursues her vision of excellence through whatever she is doing, and leaves others to determine whether she is working or playing." I invite you to visit our website and see our gallery of successful stories.

Beauty. Balance. Breath.®
